PROFILE

Computer Science Engineer with experience in game development, mathematics tutoring. Passionate about technology, education, and interactive learning.

EDUCATION

9-Month Diploma Game Programming Track

Information Technology Institute (ITI)

10/2024 – 06/2025
Smart Village branch

- **Unity (C#)** – 2D/3D games, UI, animation, physics, and scripting
- **Unreal Engine (Blueprints & C++)** – Character systems, AI, input handling
- **OpenGL** – Rendering pipeline, shaders, transformation matrices
- **Phaser.js** – Web-based game development using JavaScript
- **Networking** – Basics of multiplayer architecture, client-server models
- Developed interactive experiences for **VR and AR** on **Meta Quest** using Unity
- **OOP (Object-Oriented Programming)** – Game architecture, design patterns, modularity

Bachelor's Degree in Computer Engineering

Zagazig University

Grade : Very Good with honors

08/2018 – 06/2023
Zagazig, Egypt

SKILLS

- Programming: C, C++, C#
- Game Development using SFML, OpenGL, Unreal and Unity

PROJECTS

Graduation Project – TBN

Information Technology Institute (ITI) – Game Development Track

Developed **TBN**, a 2.5D mobile game

05/2025 – 06/2025

- Designed core mechanics: platforming, shooting and a memory-based narrative system.
- Built responsive UI, interactive environments, and enemy AI behavior.
- Managed gameplay flow across three story-driven levels.
- Delivered a playable Android build with performance optimized for mobile devices.

Boos Game Jam – The Lighthouse of Dagon

PC game

01/2025 – 02/2025

- Focused on gameplay programming, level pacing, and scene transitions.
- Collaborated with a small team on design, art integration, and final polishing.

Beginners Game Jam – Message Under Fire

Windows and WebGL game

12/2024 – 12/2024

- Won 2nd place in the jam
- Handled input systems, text delivery, and basic logic flow in Unity.

ITI Internal Game Jam – Junk It

SFML Game

11/2024 – 11/2024

- Developed a 2D game using C++ and SFML in under 36 hours.
- Applied object-oriented programming principles to structure game entities and systems.
- Integrated basic SFML shaders for visual effects.
