PROFILE

Computer Science Engineer with experience in game development, mathematics tutoring. Passionate about technology, education, and interactive learning.

PROFESSIONAL EXPERIENCE

Unity Developer

09/2025 – Present

Lessonara

Cairo

- Developing educational game and interactive virtual labs.
- Optimize game performance and ensure smooth gameplay flow.
- Integrate and manage APIs and third-party SDKs.
- Handle app deployment and publishing on **App Store** and **Google Play**.

Unreal Developer

08/2025 – 09/2025

3Verse Studio

- Developed multiplayer games using UE5.3 for mobile and VR

Math and Physics Private Tutor

08/2023 – 10/2024

- Provided online mathematics instruction to Saudi exchange students
- Developed engaging lesson plans aligned with the UK curriculum to enhance student understanding and performance.
- Monitored and assessed student

EDUCATION

9-Month Diploma Game Programming Track

10/2024 – 06/2025

Information Technology Institute (ITI)

Smart Village branch

- **Unity (C#)** – 2D/3D games, UI, animation, physics, and scripting
- **Unreal Engine (Blueprints & C++)** – Character systems, AI, input handling
- **OpenGL** – Rendering pipeline, shaders, transformation matrices
- **Phaser.js** – Web-based game development using JavaScript
- **Networking** – Basics of multiplayer architecture, client-server models
- Developed interactive experiences for **VR and AR** on **Meta Quest** using Unity
- **OOP (Object-Oriented Programming)** – Game architecture, design patterns, modularity

Bachelor's Degree in Computer Engineering

08/2018 – 06/2023

Zagazig University

Zagazig, Egypt

Grade : Very Good with honors

PROJECTS

Graduation Project – TBN

05/2025 – 06/2025

Information Technology Institute (ITI) – Game Development Track

Developed **TBN**, a 2.5D mobile game

- Designed core mechanics: platforming, shooting and a memory-based narrative system.
- Built responsive UI, interactive environments, and enemy AI behavior.
- Managed gameplay flow across three story-driven levels.
- Delivered a playable Android build with performance optimized for mobile devices.

GAME JAMS

Boos Game Jam – The Lighthouse of Dagon

02/2025

PC game

- Focused on gameplay programming, level pacing, and scene transitions.
- Collaborated with a small team on design, art integration, and final polishing.

Beginners Game Jam – Message Under Fire

12/2024

Windows and WebGL game

- Won 2nd place in the jam
- Handled input systems, text delivery, and basic logic flow in Unity.

PhaserJS Game Jam

02/2025

Multiplayer Split-Screen Web Game

- Developed using PhaserJS

SKILLS

- Programming: C, C++, C#
- Game Development using SFML, OpenGL, PhaserJS, Unreal and Unity
