PROFILE

Computer Science Engineer with experience in game development, mathematics tutoring. Passionate about technology, education, and interactive learning.

PROFESSIONAL EXPERIENCE

Unity Developer, *Lessonera*

09/2025 – Present

Cairo

- Developing educational game and interactive virtual labs.
- Optimize game performance and ensure smooth gameplay flow.
- Integrate and manage APIs and third-party SDKs.
- Handle app deployment and publishing on App Store, App Gallery, Google Play and The Website.

Unreal Developer, *3Verse Studio*

08/2025 – 09/2025

- Developed multiplayer game using UE5.3 for mobile and VR

Math and Physics Private Tutor

08/2023 – 10/2024

- Provided online mathematics instruction to Saudi exchange students
- Developed engaging lesson plans aligned with the UK curriculum to enhance student understanding and performance.
- Monitored and assessed student

EDUCATION

9-Month Diploma Game Programming Track,

10/2024 – 06/2025

Information Technology Institute (ITI) Smart Village branch

- Unity (C#) - 2D/3D games, UI, animation, physics, and scripting
- Unreal Engine (Blueprints & C++) - Character systems, AI, input handling
- OpenGL - Rendering pipeline, shaders, transformation matrices
- Phaser.js - Web-based game development using JavaScript
- Networking - Basics of multiplayer architecture, client-server models
- Developed interactive experiences for VR and AR on Meta Quest using Unity
- OOP (Object-Oriented Programming) - Game architecture, design patterns, modularity

Bachelor's Degree in Computer Engineering, *Zagazig University*

08/2018 – 06/2023

Grade: Very Good with honors

Zagazig, Egypt

SKILLS

Programming

C, C++, C#

Game Development

using SFML, OpenGL, PhaserJS, Unreal and Unity

PROJECTS

Graduation Project - TBN,

05/2025 – 06/2025

Information Technology Institute (ITI) -Game Development Track

- Developed TBN, a 2.5D mobile game
- Designed core mechanics: platforming, shooting and a memory-based narrative system.
- Built responsive UI, interactive environments, and enemy AI behavior.
- Managed gameplay flow across three story-driven levels.
- Delivered a playable Android build with performance optimized for mobile devices.

GAME JAMS

Boss Rush Game Jam - The Lighthouse of Dagon, PC game

02/2025

- Focused on gameplay programming, level pacing, and scene transitions.
- Collaborated with a small team on design, art integration, and final polishing.

PhaserJS Game Jam, Multiplayer Split-Screen Web Game

02/2025

- Developed using PhaserJS

Winter Game Jam - Message Under Fire, Windows and WebGL game

12/2024

- Won 2nd place in the jam
- Handled input systems, text delivery, and basic logic flow in Unity.
